

Test-Focused Snippets for Xcode and AppCode

Stop typing boilerplate code!

This package contains the Xcode code snippets and AppCode live templates I use for unit testing.

For Xcode:

To install the Xcode code snippets, access this folder from Terminal and type:

```
make install-xcode
```

Then relaunch Xcode.

If you ever wish to remove them, type

```
make uninstall-xcode
```

For AppCode:

To install the AppCode live templates, access this folder from Terminal and type:

```
make install-appcode
```

Then relaunch AppCode.

If you ever wish to remove them, type

```
make uninstall-appcode
```

Don't Have make?

If you don't have the make command, use the following command to install command line developer tools:

```
xcode-select --install
```
